EXAMINER PHAN, JOSEPH T				
ART UNIT 2614		PAPER NUMBER		
NOTIFICATION DATE 02/17/2011		DELIVERY MODE ELECTRONIC		

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docket_ip@pillsburylaw.com
margaret.drosos@pillsburylaw.com

Office Action Summary

Application No.

10/072,898

Applicant(s)

EBERLE ET AL.

Examiner

JOSEPH T. PHAN

Art Unit

2614

Period for Reply -- *The MAILING DATE of this communication appears on the cover sheet with the correspondence address --*

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09/23/2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) 27, 29-32, 34-38, 40-51, 54, 56-59, 61-65 and 67-78 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 27, 29-32, 34-38, 40-50, 54, 56-59, 61-65 and 67-77 is/are rejected.
- 7) ☒ Claim(s) 51 and 78 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 27, 29-32, 34-38, 40-51, 54, 56-59, 61-65, and 67-78 have been considered, Response and citations in view of the added limitation are presented below. It is noted that the added limitation of "voice address" is interpreted as any address that can receive voice.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27 and 54 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 27 and 54 lines 19-20 recites "based on the detected recipient" which is unclear and confusing if this recipient is different or the same as "a recipient" in line 11 or "a recipient" in line 18 and makes the claim indefinite. Furthermore the preamble of "providing service output information to a subscriber" in the claims contradicts the limitations of 'customizing and delivering service output information based on the detected recipient' from lines 11-20. The term 'recipient' as normally defined takes on a human presence and therefore providing service output information to 'a subscriber' and 'a recipient' insinuates there are two people that receives this information.

Appropriate clarification and/correction is required.

In response to this action, the examiner requests the applicant to clarify the claimed limitations by citing the paragraphs that support these limitations in the specification.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. **Claims 27, 29-32, 34-38, 40-50, 54, 56-59, 61-65, and 67-77 rejected under 35 U.S.C. 103(a) as being unpatentable over Surace et al., Patent #6,144,938 in view of Cox et al., Patent #5,873,032.**

Regarding claims 27 and 54, Surace teaches a system and method for providing service output information to a subscriber of a service, comprising:

service subscription means for receiving from at least one subscriber, during a subscription registration process, information specifying preferences for the content and presentation of service output information from at least one service that can output personalized

information(col.16 lines 23-29 and 40-53; specifying preferences is part of registration process), a voice address to which service output information is to be delivered via a telephone call(col.16 lines 18-29; voice address is delivering to address voice info), and criteria for customizing the service output information based on a recipient of the telephone call(col.16 lines 22-53); service processing means for processing the least one service to generate service output information that is personalized for the at least one subscriber based on the criteria specified during the subscription registration process (col.16 lines 40-53).

Surace does not expressly disclose initiating an outbound telephone call but does disclose allowing to call a contact(col.16 lines 15-18); processing the least one service to generate personalized subscriber service output information when a delivery condition has been met and delivering service output information based on the detected recipient of the outbound telephone call.

In a related field of endeavor, Cox discloses means for initiating an outbound telephone call(col.16 lines 30-32); processing the least one service to generate personalized subscriber service output information when a delivery condition has been met (col.11 lines 24-56 and col.16 lines 26-44) and delivery means for delivering service output information based on the detected recipient of the outbound telephone call (col.16 lines 26-64).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to modify Surace to include the outbound calling capabilities when a condition has been met as taught by Cox. One of ordinary skill in the art would have been motivated to do so as Surace already enables outbound calling(col.16 line 18) and discloses beneficial telephony capabilities(col.24 lines 37-45). This would allow Surace's system more flexibility and

functionality to include the old and well known capabilities of outbound calling as taught by Cox.

Regarding claims 29 and 56, Surace in view of Cox teaches the system and method of claims 28 and 55, wherein the delivery condition comprises at least one of a predetermined schedule, or a triggering event(Cox col.11 lines 24-56).

Regarding claims 30 and 57, Surace in view of Cox teaches the system and method of claims 28 and 55, wherein the delivery condition is specified by at least one of a subscriber, or an administrator(Cox col.11 lines 24-56).

Regarding claims 31 and 58, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the service output information comprises information derived from an on-line analytical processing (OLAP) system(Cox col.11 lines 24-56).

Regarding claims 32 and 59, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the service output information comprises at least one of static text messages, dynamic content, blended content, sound clips, music, or advertisements(Cox col.12 lines 10-60).

Regarding claims 34 and 61, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the at least one device comprises a voice-enabled terminal device, and the detected recipient comprises a person(Cox col.16 lines 26-64).

Regarding claims 35 and 62, Surace in view of Cox teaches the system and method of claims 34 and 61, wherein the person is queried for validation information(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 36 and 63, Surace in view of Cox teaches the system and method of

claims 35 and 62, wherein the validation information is provided by at least one of voice input, or keypad input(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 37 and 64, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the detected recipient of the outbound telephone call comprises a machine(Cox col.16 lines 26-64).

Regarding claims 38 and 65, Surace in view of Cox teaches the system and method of claims 37 and 64, wherein the machine comprises at least one of an answering machine, facsimile machine, or modem(Cox col.16 lines 26-64).

Regarding claims 40 and 67, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the criteria specified during the subscription process enables the content of the service output information to be differentiated according to whether the detected recipient of the outbound telephone call comprises a person or a machine(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 41 and 68, Surace in view of Cox teaches the system and method of claims 40 and 67, wherein the content of the service output information to be provided when the detected recipient comprises a machine is reduced from the content of the service output information to be provided when the detected recipient comprises a person(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 42 and 69, Surace in view of Cox teaches the system and method of claims 40 and 67, wherein the content of the service output information to be provided when the detected recipient comprises a machine is a message indicating that service output information intended for the at least one subscriber is available(Cox col.16 lines 26-64 and col.17 lines 12-

54).

Regarding claims 43 and 70, Surace in view of Cox teaches the system and method of claims 27 and 54, wherein the communication means comprises a call server for establishing communication with the at least one device by initiating a telephone call(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 44 and 71, Surace in view of Cox teaches the system and method of claims 43 and 70, wherein the detection means comprises a detection module, the detection module sensing a state of a call pickup sequence of the telephone call(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 45 and 72, Surace in view of Cox teaches the system and method of claims 44 and 71, wherein the state of a call pickup sequence comprises a plurality of possible states, and each of the possible states of the call pickup sequence is associated with a detected recipient and the delivery instructions for the detected recipient(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 46 and 73, Surace in view of Cox teaches the system and method of claims 45 and 72, wherein the detection module further comprises a tone detection module, and each tone detected by the tone detection module is associated with at least one of the plurality of possible states(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 47 and 74, Surace in view of Cox teaches the system and method of claims 46 and 73, wherein the tone detection module senses at least one of an answering machine tone, a facsimile machine tone, or a modem tone(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 48 and 75, Surace in view of Cox teaches the system and method of

claims 47 and 74, wherein the state of the call pickup sequence comprises at least one of receipt by a person, receipt by an answering machine, receipt by a facsimile machine, or receipt by a modem(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 49 and 76, Surace in view of Cox teaches the system and method of claims 45 and 72 further comprising an interface to an authorization database, the authorization database storing entries associating each of the plurality of possible states with the corresponding detected recipient and the delivery instructions for the detected recipient(Cox col.16 lines 26-64 and col.17 lines 12-54).

Regarding claims 50 and 77, Surace in view of Cox teaches the system and method of claims 45 and 72 further comprising wherein the association between the plurality of states and corresponding detected recipients can be altered by an administrator or a subscriber(Surace col.16 lines 23-53 and Cox col.16 lines 26-44).

Allowable Subject Matter

6. Claims 51 and 78 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH T. PHAN whose telephone number is (571)272-7544. The examiner can normally be reached on Monday-Thursday 9am-7pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang can be reached on (571) 272-7547. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
